

*Scott Bernhard, Architect, AIA, NCARB
Jean & Saul A. Mintz Associate Professor of Architecture
President, Lime Agency for Sustainable Hot Humid Design
Principal, Prosus Design*

1.0 BIOGRAPHICAL SUMMARY

professional and academic work

Scott Bernhard holds the Jean & Saul A. Mintz Professorship in Architecture at the Tulane School of Architecture in New Orleans where he has been a member of the faculty for 24 years. Scott has served as both Interim Dean and Associate Dean at the School and has held many other minor administrative positions there. He is the recipient of numerous teaching awards including the "President's Award for Graduate and Professional Teaching," the "Inspirational Teacher Award" and the "Excellence in Teaching Award," University wide honors bestowed by Tulane. He was the 1995 Tulane School of Architecture Professor of the Year, and won the Malcolm W. Heard Teaching Award in 2001, 2007 and again in 2013. He is a licensed Architect and a principal of Prosus Design—a small, private research and design practice focused on building in the climate and context of New Orleans. He has built more than a dozen residential additions and minor buildings in New Orleans and the surrounding region, winning AIA Honor Awards and other honors for his work. Since 2001 he has taught design studio and seminar courses investigating the subject of multi-family housing which has become the basis of his current academic research. He was the Graphic Designer for The French Quarter Manuel and other books on New Orleans architecture. He is the coauthor of a forthcoming book on New Orleans architecture and principal investigator on numerous grants investigating the past and future of New Orleans housing typology and urban morphology. Scott recently became president of the Lime Agency for Sustainable Hot/Humid Design – a new non-profit organization dedicated to green building practices in the hot/humid tropical and subtropical zones, such as New Orleans.

In his former position as Director of the Tulane City Center, he was responsible for all aspects of the Center's operation, planning, and design quality. He worked with program directors, project coordinators, co-lateral organizations and institutional partners to create the context for successful outreach and applied research efforts. In this role he oversaw the completion of more than 75 successful design and construction projects working with dozens of community partners throughout New Orleans between 2007 and 2012. The work of the Tulane City Center received many National awards including ASLA and AIA, and SEED awards and has received more than a dozen large grants and private donations totaling over two million dollars in the five years under Scott's direction. A book chronicling this work is forthcoming in 2014.
